Defend

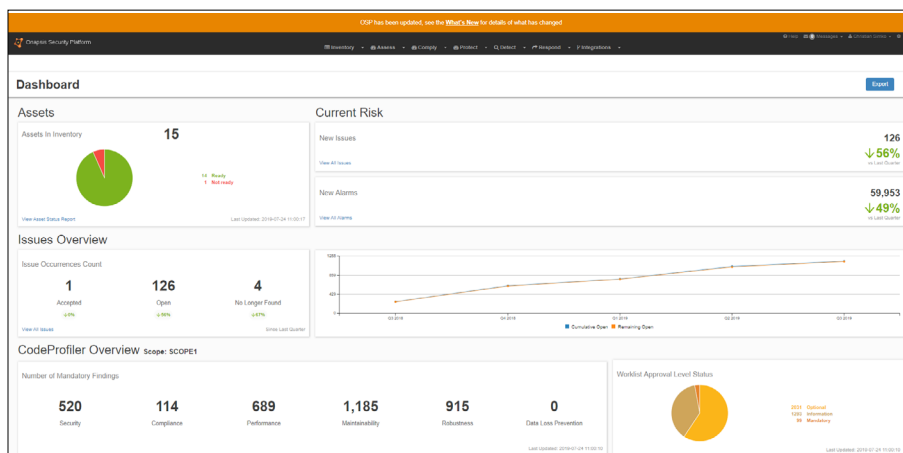

ACTIVABLE INSIGHT

Discover, assess and remediate application-layer vulnerabilities, system-level misconfigurations, custom code issues and ensure ERP systems are protected and available.

Evaluating the ERP footprint, finding problems and prioritizing remediation for:

- System Vulnerabilities
- Configuration Issues
- Authorization Issues (associated with default accounts/roles)
- SAP Interface Vulnerabilities
- Deployed SAP Custom Code Vulnerabilities
- SAP Transport Forensics (received by systems)

ASSESS by Onapsis delivers actionable insight for your ERP system so cross-functional teams can quickly and easily discover, assess and prioritize remediation of application vulnerabilities, misconfigurations and code quality issues. Protecting your ERP systems and most business-critical applications is two-fold. First, you need to understand your ERP footprint and the relationships between system assets. Then, you need the ability to rapidly identify and fix system, and code issues that can impact stability and performance.

EVALUATION

Understand the entire ERP footprint. Analyze interfaces and generate graphical topology maps to build ERP system inventories. Assess system configurations, and custom code to identify vulnerabilities and manage risk.

PRIORITIZATION

Proactively identify ERP misconfigurations and vulnerabilities and measure business impact to help prioritize fixing or patching and reduce risk.

REMEDIATION

Streamline and accelerate remediation of system and code vulnerabilities and misconfigurations with ticketing system integration (ServiceNow).

SECURE THE CORE

Secure the core of your business by providing code, application and ERP system-level visibility and protection against internal and external attacks.

CLOUD WITH CONFIDENCE

Accelerate cloud migration and digital transformation by ensuring your ERP applications are secure and ready for the cloud.

CHANGE ASSURANCE

Reduce the operational risk associated with ERP maintenance and modernization, ensuring the reliability and performance of business-critical applications.

AUTOMATE THE AUDIT

Establish an automated and repeatable compliance reporting and audit process providing efficiencies and freeing up valuable resources.

ABOUT ONAPSIS

Onapsis protects the applications that run the global economy by delivering a next-generation business application platform providing actionable insight, change assurance, automated governance and continuous monitoring. Onapsis empowers organizations to modernize business-critical SAP and Oracle E-Business Suite ERP systems, while keeping them protected and compliant. For more information, visit www.onapsis.com.

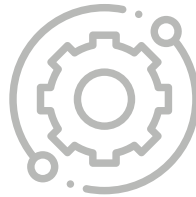

WHY ONAPSIS

IT: The most important mission of the IT organization is keeping the company's vital ERP systems stable and running to meet the organization's business objectives. Assess by Onapsis delivers a thorough analysis of your ERP code and systems, and automates repetitive manual processes to save valuable resources, increase operational reliability and minimize the attack surface.

INFOSEC: Visibility into ERP system, and code vulnerabilities with at-a-glance views and detailed reports enables you to better and more proactively address security issues at the ERP application layer. Assess by Onapsis provides you with extensive possibilities to identify the causes, prioritize them and solve the underlying problems.

GRC: The foundation of a GRC program is the constant identification of risks and compliance conflicts and the potential impact on the organization. Assess by Onapsis identifies vulnerabilities and misconfigurations, provides business impact analysis and helps prioritize and schedule remediation to quickly mitigate issues affecting compliance.
