

# CONTROL BY ONAPSIS

Assess

**Control**

Comply

Defend

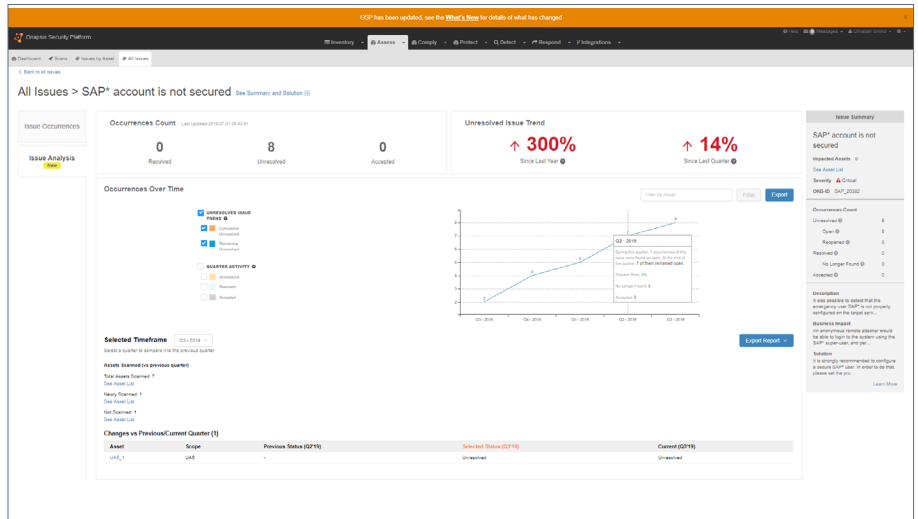

## SECURE CHANGE

Control and mitigate operational risks associated with routine code, application and system maintenance, transports, patching and modernization initiatives.

Managing change and preventing disruptions:

- Analyze SAP Transports in Real-Time
- Secure Custom Applications (code and configurations) before Transporting to Production
- Block Bad SAP Transports to Prevent Disruptions to Production Systems
- Lock Configurations to Prevent Unauthorized Changes and Drift

**CONTROL by Onapsis** delivers the ability to shift security and stability testing and analysis into the development cycle for ERP systems. Automating code analysis, transport inspection and configuration assessment and enforcement frees up valuable resources to focus more on optimizing and modernizing business-critical applications. By ensuring system, application and code changes driven by routine updates, upgrades, patches and transports will not create new issues or vulnerabilities, you will keep your most important applications stable, highly available, secure and compliant.

### STRENGTH

Continuously assess code, transports and configuration baselines to maintain a desired state for your ERP systems through regular changes, upgrades and optimization initiatives.

### PREVENTION

Automatically block poor code, transport errors and critical system changes to prevent ERP systems from becoming insecure or non-compliant while continuously ensuring adherence to corporate policies.

### INTEGRITY

Enforce approval of code, transports and system configuration changes to ensure the stability, robustness and security of your ERP systems meet business objectives.

### SECURE THE CORE

Secure the core of your business by providing code, application and ERP system-level visibility and protection against internal and external attacks.

### CLOUD WITH CONFIDENCE

Accelerate cloud migration and digital transformation by ensuring your ERP applications are secure and ready for the cloud.

### CHANGE ASSURANCE

Reduce the operational risk associated with ERP maintenance and modernization, ensuring the reliability and performance of business-critical applications.

### AUTOMATE THE AUDIT

Establish an automated and repeatable compliance reporting and audit process providing efficiencies and freeing up valuable resources.

### ABOUT ONAPSIS

Onapsis protects the applications that run the global economy by delivering a next-generation business application platform providing actionable insight, change assurance, automated governance and continuous monitoring. Onapsis empowers organizations to modernize business-critical SAP and Oracle E-Business Suite ERP systems, while keeping them protected and compliant. For more information, visit [www.onapsis.com](http://www.onapsis.com).

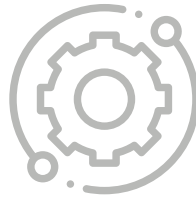

## WHY ONAPSIS

**IT:** It is your responsibility to continually meet the uptime and performance demands for the business-critical applications that support your organization. Control by Onapsis enables you to design DevOps securely and to implement a security-by-design approach in all your relevant ERP projects. You will get control of code, transport and configuration changes from development to production to ensure stability and security.

**INFOSEC:** Planned and unplanned change can cause serious security vulnerabilities that must be controlled and managed. Control by Onapsis automates functionalities to enforce change processes and provides visibility into ERP system vulnerabilities in code, transports and the application-layer to protect the core of your business.

**GRC:** As new technologies begin to transform the business, change introduces risk to the organization. You face challenges to mitigate risk, govern information security, protect against fraud and play a role in safeguarding the company from cyber threats. Control from Onapsis helps keep ERP systems in a desired state to reduce risk and meet security and compliance requirements.

## THE ONAPSIS PLATFORM

Protecting the Global Economy, One Business Application at a Time

*Onapsis protects SAP and Oracle E-Business Suite and the applications that run your business*
