CONTINUOUS MONITORING

Real-time visibility and threat alerts to respond quickly to unauthorized changes, misuse or cyberattacks targeting ERP systems and business-critical applications.

Monitoring ERP system and business risk for:

- System Attacks in Near Real-Time
- System and Interface Misconfiguration
- Inappropriate Privilege Escalation
- Authorization Misuse and Abuse
- Incorrect SAP Transports
- Transports with Unauthorized or Insecure Custom Code

DEFEND By Onapsis delivers continuous monitoring for complete, real-time visibility into your ERP systems whether on-premises or in the cloud. Detect changes, critical transactions and user activity that introduces risks, exploits a vulnerability or takes the organization out of compliance. With Defend, create a mitigation plan and arm your Security Operations Center and Incident Response teams with the capabilities to respond to internal and external threats in near real-time.

The screenshot displays the Onapsis Security Platform interface. At the top, a notification states '10KBLAZE' and provides information about a recent exploit targeting SAP business applications. Below this, a table lists various issues detected, including ACL file misconfigurations and missing ACL files. The table columns include 'Issue Name', 'Severity', 'Unresolved', and 'Last Detected'. Below the table, there is a section for 'Indicators of Attack' with a table listing incident names, first detected dates, last detected dates, severity, and counts.

Issue Name	Severity	Unresolved	Last Detected
SAP_17602 SAP Message Server ACL file is not secure	Critical	1	2018-07-21 07:28:47
SAP_10501 ACL file length contains at least one Critical code	Critical	1	2018-07-21 07:28:47
SAP_10202 SAP Message Server ACL file is not secure	Critical	1	2018-07-22 11:28:58
SAP_10501 ACL file length contains at least one Critical code	Critical	1	2018-07-21 07:28:47
SAP_10202 SAP Message Server ACL file is not secure	Critical	1	2018-07-22 11:28:58

Asset Name	Incident Name	First Detected	Last Detected	Severity	Count
A01	Potential untrusted application server registered in the SAP Message Server	2018-02-27 10:11:48	2018-07-20 10:21:12	High	2
T71	Potential untrusted application server registered in the SAP Message Server	2018-05-11 07:52:34	2018-07-18 18:25:09	High	337
T71	Potential untrusted application server registered in the SAP Message Server	2018-04-04 11:28:47	2018-05-08 15:53:37	High	2224
T71_3	Potential untrusted application server registered in the SAP Message Server	2018-01-29 15:11:39	2018-05-08 10:17:51	High	1131
T71_2	Potential untrusted application server registered in the SAP Message Server	2018-03-03 13:52:59	2018-07-18 18:25:09	High	1566
T71	Potential untrusted application server registered in the SAP Message Server	2018-07-28 14:17:31	2018-07-28 18:44:59	High	18
U45	Potential untrusted application server registered in the SAP Message Server	2018-05-01 08:28:06	2018-07-18 09:22:17	High	18

DETECTION

Enable continuous monitoring and visibility of threats against your ERP systems to detect cyberattacks and privilege misuse whether on-prem, or in a private, public or hybrid cloud environment.

ALERTING

Receive immediate identification of improper use of functions that expose sensitive information, contextual attack notifications with success probabilities, and customized alarms for specific users and their transactions.

RESPONSE

Accelerate risk mitigation and remediation with streamlined vulnerability management, automated alarm notifications and integration with SIEM products.

SECURE THE CORE

Secure the core of your business by providing code, application and ERP system-level visibility and protection against internal and external attacks.

CLOUD WITH CONFIDENCE

Accelerate cloud migration and digital transformation by ensuring your ERP applications are secure and ready for the cloud.

CHANGE ASSURANCE

Reduce the operational risk associated with ERP maintenance and modernization, ensuring the reliability and performance of business-critical applications.

AUTOMATE THE AUDIT

Establish an automated and repeatable compliance reporting and audit process providing efficiencies and freeing up valuable resources.

ABOUT ONAPSIS

Onapsis protects the applications that run the global economy by delivering a next-generation business application platform providing actionable insight, change assurance, automated governance and continuous monitoring. Onapsis empowers organizations to modernize business-critical SAP and Oracle E-Business Suite ERP systems, while keeping them protected and compliant. For more information, visit www.onapsis.com.

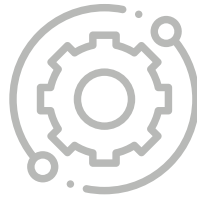

WHY ONAPSIS

IT: Keeping your ERP systems stable and performing by addressing unexpected downtime, code vulnerabilities and security issues is a top priority. Defend by Onapsis provides continuous monitoring of your business-critical applications so that you can have near real-time alerting of any threats that could jeopardize uptime, functionality and availability.

INFOSEC: Protecting the business-critical applications that power your business requires deep expertise and knowledge. Defend by Onapsis delivers near real-time alerting of internal or external threats, reducing the time to detect issues and incidents. Only the Onapsis Research Labs delivers early insights into potential security risks, as they work around the clock to discover security threats to SAP and Oracle EBS.

GRC: Continuous monitoring is key to the success of your governance, risk and compliance program. Near real-time alerting and automation enable you to go beyond your compliance requirements and create a security program that protects your critical business applications efficiently. With continuous monitoring, you achieve, maintain and demonstrate compliance faster than before and with fewer resources.
