

# ONAPSIS PLATFORM FOR SAP

## SECURE THE CORE

Secure the core of your business by providing code, application and ERP system-level visibility and protection against internal and external attacks.

## CLOUD WITH CONFIDENCE

Accelerate cloud migration and digital transformation by ensuring your ERP applications are secure and ready for the cloud.

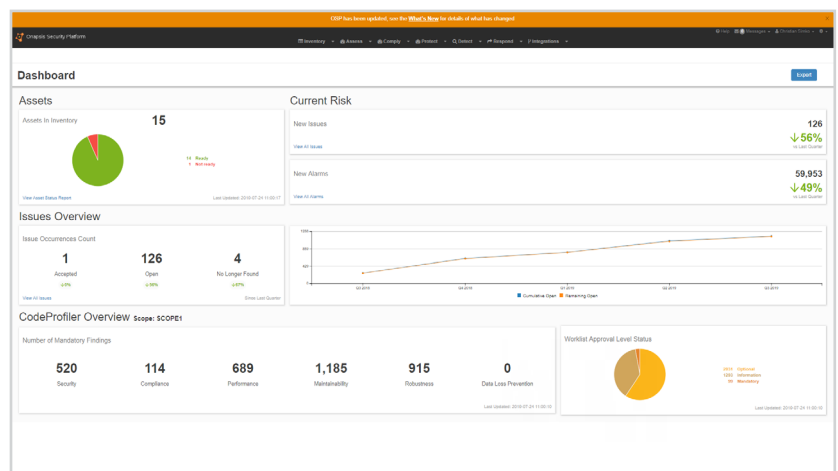

## CHANGE ASSURANCE

Reduce the operational risk associated with ERP maintenance and modernization ensuring the reliability and performance of business-critical applications.

## AUTOMATE THE AUDIT

Establish an automated and repeatable compliance reporting and audit process providing efficiencies and freeing up valuable resources.

Organizations are facing increasing pressure to optimize business-critical SAP applications by balancing strategic transformation initiatives, application performance, regulatory compliance and cybersecurity requirements. The Onapsis Platform automates testing, change, audit and security processes so cross-functional teams can focus on improving SAP availability and performance, accelerating cloud migrations and S/4HANA implementations, streamlining audit processes and hardening security on-premises and in the cloud.

## ACTIONABLE INSIGHT

Discover, assess and fix custom and third-party code, application-layer vulnerabilities, and system-level misconfigurations to ensure the highest possible application performance.

## AUTOMATED GOVERNANCE

Ensure IT controls are continually tested and validated to meet compliance requirements and enforce configurations to prevent drift and harden systems.

## CONTINUOUS MONITORING

Capabilities to detect and alert you of threats so you can respond quickly to unauthorized changes or attack.

## SECURE CHANGE

Control and mitigate operational risks associated with routine application and system maintenance, patching and modernization initiatives.

## SAP APPLICATIONS

The Onapsis Platform delivers a near real-time preventive, detective and corrective approach for securing SAP systems, whether deployed on-premises, or in a private, public or hybrid cloud environment. The Onapsis Platform provides unmatched coverage and protection across SAP NetWeaver®, ABAP®, J2EE, SAP HANA® and S/4HANA® platforms. The platform integrates with network security, GRC solutions, SIEM solutions and workflows as well as leading cloud providers.

## ABOUT ONAPSIS

Onapsis protects the applications that run the global economy by delivering a next-generation business application platform providing actionable insight, change assurance, automated governance and continuous monitoring. Onapsis empowers organizations to modernize business-critical SAP and Oracle E-Business Suite ERP systems, while keeping them protected and compliant. For more information, visit [www.onapsis.com](http://www.onapsis.com).

## THE ONAPSIS PLATFORM

### ASSESS

Provides actionable insight to quickly discover, assess and eliminate application vulnerabilities and prioritize and improve SAP code quality.

- Discovery: Native SAP code, interface, transport and system analysis generates asset inventories to guide system discovery and profiling
- Remediation: Streamline vulnerability remediation with automated code clean up and ticketing system integration
- Prioritization: Proactive identification and measurement of vulnerabilities and misconfigurations to prioritize patching, risk mitigation and compliance violations

### CONTROL

Eliminates operational risks associated with SAP maintenance and modernization by proactively managing configuration changes, hardening code and assessing transports.

- Strength: Inspect custom code to ensure quality and consistency through routine maintenance and upgrade cycles
- Integrity: Inspect all SAP transports and third-party updates from development to production and enforce approval of out-of-band changes
- Prevention: Monitor and block critical changes to ensure SAP system configurations remain in a secure and compliant state

### COMPLY

Enables automated governance with powerful enforcement and reporting capabilities to significantly reduce the burden of proving compliance.

- Compliance: Simplify audit processes to record, log and audit activity for regulatory compliance reporting such as SOX and GDPR
- Assess: Automate continuous compliance assessments of SAP systems to proactively measure risk and stay ahead of the audit cycle
- Policies: Get started with out-of-the-box compliance policies and customize policies to meet specific compliance requirements

### DEFEND

Delivers continuous monitoring for complete, real-time visibility into SAP systems to quickly respond to internal and external threats.

- Awareness: Continuous monitoring and visibility of threats against SAP environments on-premises or in a private, public or hybrid cloud
- Response: Accelerate risk mitigation and remediation with automated alarm notifications and SIEM integration
- Alerting: Immediate identification and notification of unauthorized use, improper transactions and contextual attack based on likelihood of success

## POWERED BY THE ONAPSIS RESEARCH LABS

The Onapsis Research Labs and our team of recognized security experts combine in-depth knowledge and experience to deliver technical analysis with business context and provide sound security judgment to the market. We work closely with both the SAP® and Oracle security teams to responsibly inform them of vulnerabilities that will be addressed in SAP Security Notes and Oracle Critical Patch Updates.
