

CYR3CON
be in the know, now.

INTRODUCTION TO CYR3CON

TODAY'S CISO

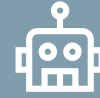

"We can't analyze everything – let's focus on high and critical vulnerabilities."

TODAY'S HACKER

"Hmmm, my darkweb friend passed me this exploit for this 'low severity' vulnerability."

CYR3CON MACHINE LEARNING

"Don't worry. I read and analyze everything the hackers are discussing – I know he's getting an exploit ready!"

GET AHEAD OF HACKERS

Go beyond your current intelligence – CYR3CON's machine learning acts as a virtual analyst advising you on what vulnerabilities the hackers will target and backs up the predictions with the latest data gathered from hundreds of sources – including darkweb, deepweb, OSINT, social media, blogs, and more.

Client-specific predictions enabled by workflow integrations

Timely and accurately quantified predictions

Contextual Prediction: tells clients what evidence drove the prediction

STORY OF CYR3CON

CYR3CON was founded in 2016 based on peer-reviewed research the founders conducted under funding of the Defense and Intelligence communities – funding that was designed to create the next generation of predictive cybersecurity. Today, CYR3CON is a venture-backed company with multiple Fortune 100 clients using its SaaS-based, AI-driven platform.
